GUIDES AND GENERAL RULES

The Brand

It was pretty big challange to find a perfect solution for the symbol, since most imporant technology behind the Koniku is bio - the Neuron. Symbol has a powerfull and complex cell presented in an elegant, simple and yet understandable way.

THE LOGO		
SYMBOL		WORDMARK
		KONIKU ®

Space Between the Icon and Wordmark

The Space between the Icon and the Wordmark is equal to the counter space in the 'O' of the Wordmark. It simply gives the enough breathing space so the logo can remain strong and sharp even when it's presented in smaller dimensions.

Exclusion Zone

The Exclusion Zone ensures the legibility and impact of the Logo by isolating it from competing visual elements such as text and supporting graphics.

This zone should be considered as the absolute minimum safe distance, in most cases the Logo should be given even more room to breath. The exclusion zone is equal to the size of the “O” letter (marked as x in the diagram).

General Guidelines

USING AND PLACING A LOGO

Incorrect Usage

Next step towards perfection is making sure the alignment, color and spacing are right. Since the brand is perfectly crafted, there’s no need for future corrections, so try not to do the following:

DON'T USE OTHER COLOURS

DON'T USE OTHER TYPOGRAPHY

DON'T USE LOW CONTRAST BACKGROUNDS

DON'T USE SHADOWS AND STROKES

DON'T SCALE DISPROPOTIONATELY

DON'T USE IMAGE BACKGROUNDS

Correct Usage

Every once in a while, there is a need to adjust the logo to a different surrounding. If it's so - please follow these recommendations:

USE FULL COLOURS

MONOGRAM VERSION

POSITIVE VERSION

USE HIGH CONTRAST BACKGROUND

GREYSCALE VERSION

Brand Size

WEB AND PRINT SIZES

Web Size

Placing the brand logo on the web is different from any other tangible form. In this case pixels are showing us the logo whether it's big or small, but there is a finite number of pixels in one viewable area.

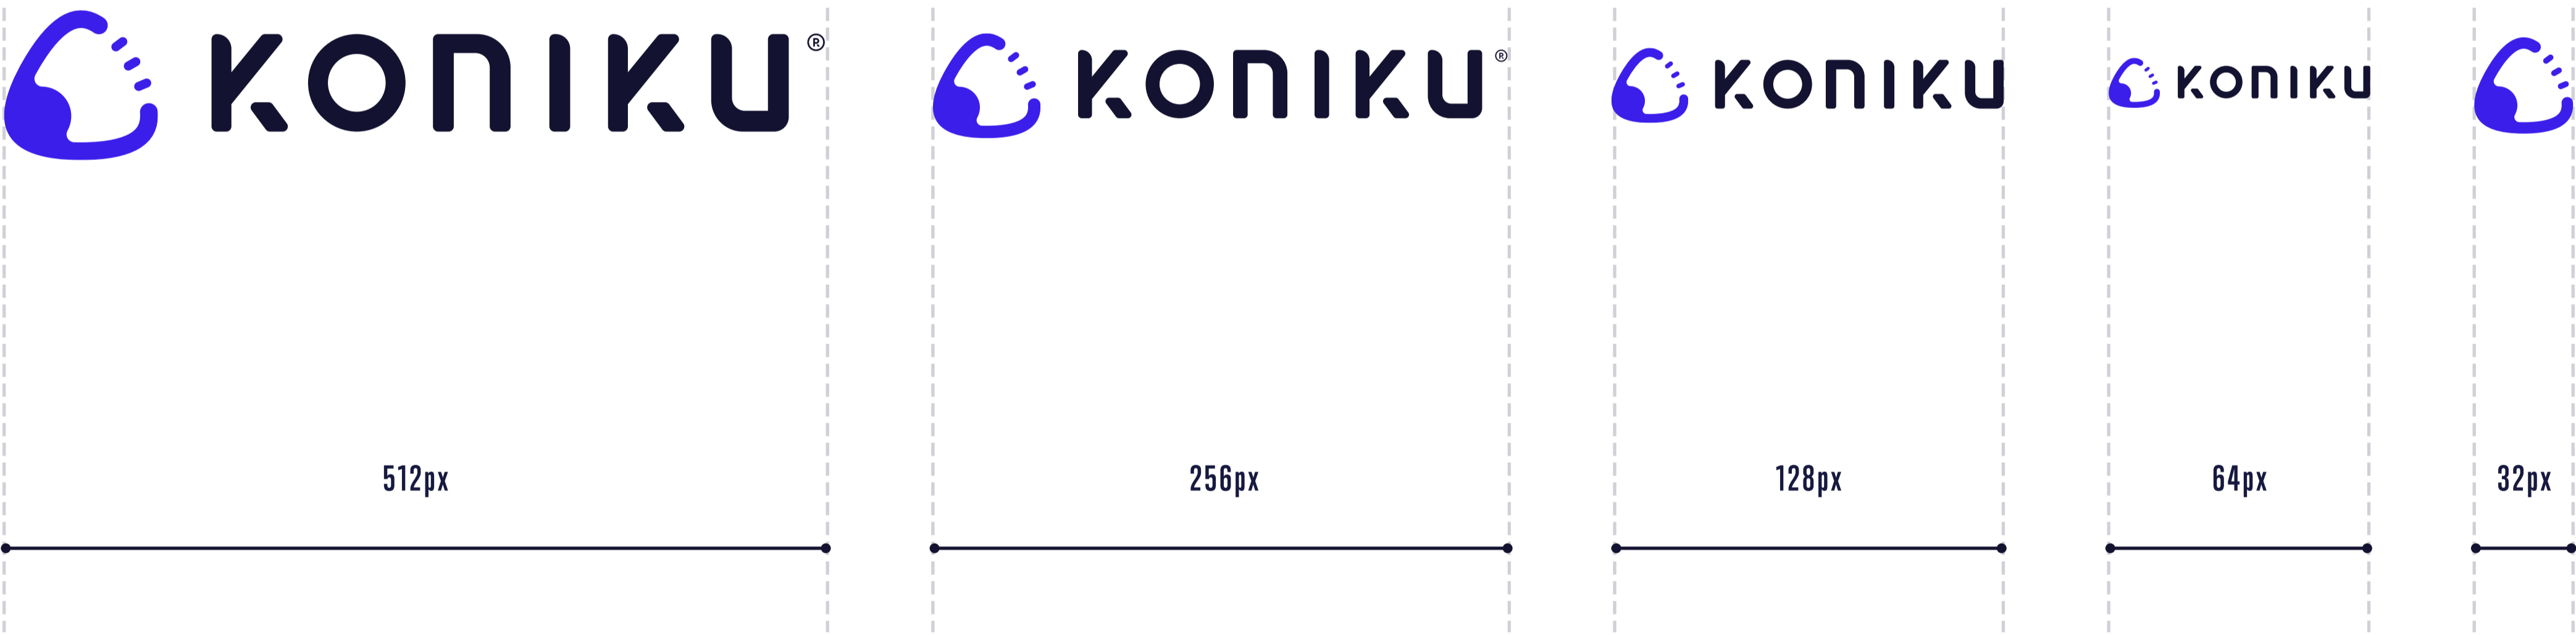

Print Size

Printing the logo on the paper is something else. There needs to be that pleasant feeling when the paper is held by the viewer and the smallest logo is shown.

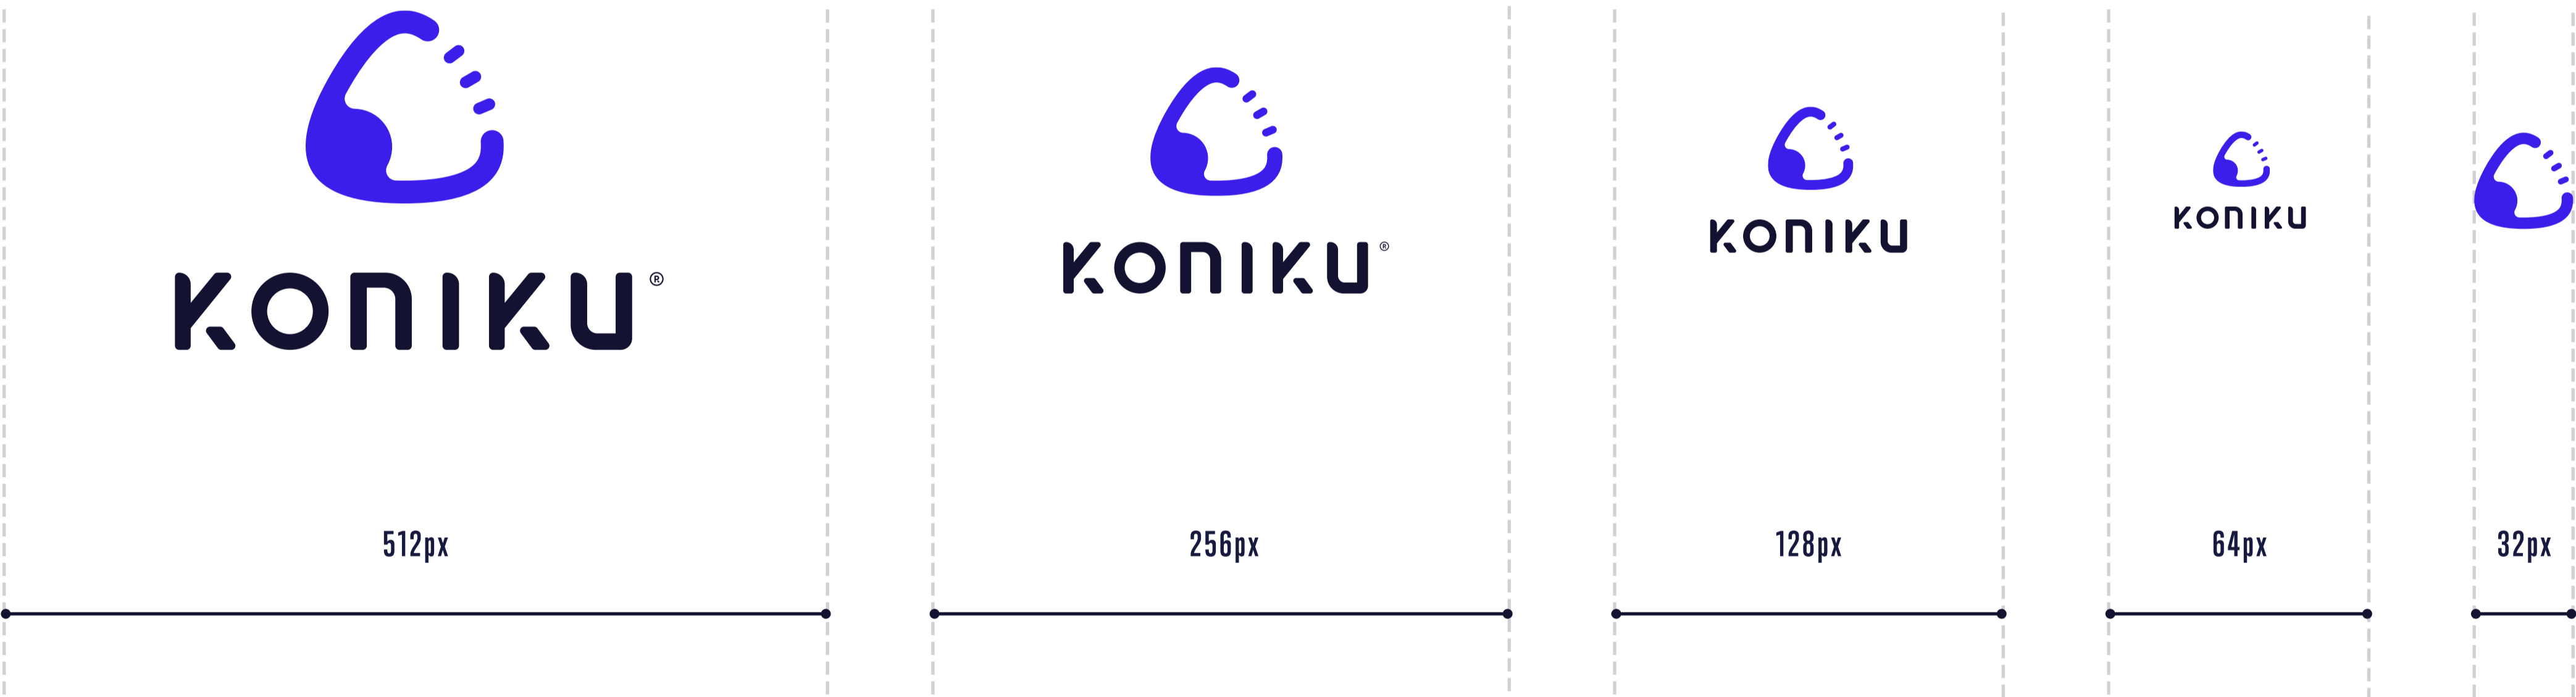

Responsive scale - Horizontal Logo

As the horizontal logo gets smaller it reaches the pinpoints which are +512px, 256px, 128px, 64px, 32px. There are no midpoints, only these suggested sizes. Responsive brand logo is an approach to web design aimed at crafting it to provide an optimal viewing and interaction experience.

Responsive scale - Vertical Logo

As the vertical logo gets smaller it reaches the pinpoints which are +512px, 256px, 128px, 64px, 32px. There are no midpoints, only these suggested sizes. Responsive brand logo is an approach to web design aimed at crafting it to provide an optimal viewing and interaction experience.

Brand Typeface

FONT SELECTION

Roboto

Roboto has a dual nature. It has a mechanical skeleton and the forms are largely geometric. At the same time, the font features friendly and open curves. While some grotesks distort their letterforms to force a rigid rhythm, Roboto doesn't compromise, allowing letters to be settled into their natural width.

This makes for a more natural reading rhythm more commonly found in humanist and serif types.

Thrump Gothic Pro

Trump Gothic Pro is a multiscript family of six fonts, each containing over 1020 glyphs and a wealth of OpenType features, including small caps, caps-to-small-caps, stylistic alternates, unicas/monocase alternates, fractions, ordinals, class-based kerning, and support for Latin, Cyrillic and Greek locales.
